**PROFESSOR J. E. DUERDEN
ON HAWAIIAN ZOOLOGY**

Last year Professor J. E. Duerden spent several months in Honolulu, studying and collecting the live corals of Hawaii, under the auspices of the Carnegie Institution. Professor Duerden was then connected with the University of Michigan. He is now located at the Rhodes University College at Grahamstown, Cape Colony.

The June number of "Science," the organ of the American Association for the advancement of science, contains the following pleasant and appreciative notice of the Professor's sojourn in Honolulu:

MARINE ZOOLOGY IN THE HAWAIIAN ISLANDS.

To the Editor of Science: At a time when zoologists are making their plans for summer vacation work it seems opportune to direct attention to the advantages offered even in such a distant territory as the Hawaiian Islands. During a visit to the islands last year, under the auspices of the Carnegie Institution, for the purpose of studying the living corals, I was afforded the privileges of the public aquarium recently established near Honolulu, and the directors of the institution desire it to be known that they will be prepared to accord a similar courtesy to other zoologists visiting the islands for purposes of research.

The aquarium is a modest structure, erected a little over a year ago, and is under the control of the Rapid Transit Company, though the funds were largely provided by the generosity of different gentlemen interested in the welfare of the islands. It is most advantageously situated at Waikiki Beach, a suburb of Honolulu, and the adjacent coral flats constitute most favorable collecting ground. Though no special appliances beyond exhibition and experimental tanks are available, yet the advantages of these and a constant supply of sea-water appeal to any student desirous of carrying out investigations on living forms. Moreover, with a generosity which is very praiseworthy, the directors are prepared to make whatever reasonable adaptations may be required.

Our knowledge of the marine fauna of the Hawaiian Islands is becoming rapidly extended, mainly through the reports on the collections made by the U. S. Fishery Bureau, under the direction of President D. S. Jordan, during two successive seasons, 1901 and 1902. The large addition to the number of species of fishes alone shows how very desirable was such faunistic work, and other groups are yielding a corresponding number of new forms. The physical conditions of the coral reefs have been studied in part by Professor A. Agassiz. Though the luxuriance of the life on the reefs does not equal that in the more distant Tahiti, Samoa, or the Philippine Islands, yet there is sufficient, particularly in such places as Kaneohe Bay, to satisfy the most ardent investigator.

For the student of terrestrial forms the islands are particularly interesting on account of the influence of introduced animals and plants upon an indigenous fauna and flora. Representatives from the east and from the west, from temperate and from tropical regions, here flourish, and against the pests a strong corps of entomologists is engaged in further introduction of possible remedial forms. The fact that the land shells of the islands served to supply the Rev. J. T. Gulick with material for the theory of isolation adds an interest to the evolutionary biologist. The ethnology and various departments of natural history are well cared for by Professor T. H. Brigham, of the Bishop Museum, and his staff of assistants.

As a last word of attraction regarding the situation of the aquarium one may quote from the "Report on Collections of Fishes made in the Hawaiian Islands" by Professor O. P. Jenkins:

"Of all situations about the island of Oahu, the submerged reef which extends from the entrance of the harbor of Honolulu to some distance past Waikiki furnishes the most prolific supply of fishes, both as to number of species and amount of the catch. This reef at low water is from a few inches to a few feet under water and extends from one mile to two or three miles from the shore, where the water abruptly reaches great depths. Over the surface and along the bluff of this reef may be found representatives of most of the shore fauna of the Hawaiian Islands. This reef, so favorably situated, so accessible, and so rich in material, can not fail to be of increasing interest to naturalists who may have the good fortune to devote themselves to the study of its wonderful life."

PROMINENT WEST INDIA MERCHANT CURES HIS DAUGHTER OF A THREATENED ATTACK OF PNEUMONIA.

"Some time ago my daughter caught a severe cold. She complained of pains in her chest and had a bad cough. I gave her Chamberlain's Cough Remedy according to directions and in two days she was well and able to go to school. I have used this remedy in my family for the past seven years and have never known it to fail," says James Prendergast, merchant, Annato Bay, Jamaica, West India Islands. BAD COMPLEXIONS

Dry Thin and Falling Hair
and Red Rough Hands

Prevented by

CUTICURA SOAP.

MILLIONS use CUTICURA SOAP exclusively for preserving, purifying, and beautifying the skin, for cleansing the scalp of crusts, scales, and dandruff, and the stopping of falling hair, for softening, whitening, and soothing red, rough, and sore hands, in the form of baths for annoying irritations, inflammations, and chafings, or too free or offensive perspiration, in the form of washes, for ulcerative weaknesses, and for many sanative antiseptic purposes which readily suggest themselves to women, and especially to mothers, and for all the purposes of the toilet, bath, and nursery. No amount of persuasion can induce those who have once used it to use any other, especially for preserving and purifying the skin, scalp, and hair of infants and children. CUTICURA SOAP combines delicate emollient properties derived from CUTICURA, the great skin cure, with the purest of cleansing ingredients and the most refreshing of flower odors. No other medicated soap ever compounded is to be compared with it for preserving, purifying, and beautifying the skin, scalp, hair, and hands. No other foreign or domestic toilet soap, however expensive, is to be compared with it for all the purposes of the toilet, bath, and nursery. Thus it combines in ONE SOAP at ONE PRICE, the best skin and complexion soap, the best toilet and best baby soap in the world.

Complete External and Internal Treatment for Every Humour. Consisting of CUTICURA SOAP, to cleanse the skin and scalp of crusts and scales and soften the thickened cuticle, CUTICURA Ointment, to instantly relieve itching and irritation, and soothe and heal, and CUTICURA RESOLVENT, to cool and relieve the blood, sold through- out the world. Australian Depot: R. TOWN & CO., Sydney, N. S. W. So. African Depot: LESSON LTD., Cape Town. "How to have Beautiful Skin, Hair, and Hands," free. FORTER CORP., Boston, U. S. A. Sole Props., CUTICURA Preparations.

**NO MONEY IN SIGHT
TO REDEEM WARRANTS**

"It is all off," said Treasurer Campbell yesterday. "The parties who were to put up the \$500,000 to handle the Territorial warrants, thus cutting off the discount of the banks, have notified me that the negotiations are at an end. They were to have made five per cent for the money advanced, but this with the time and trouble that it would have taken to adjust the deal and get matter in running shape, would have netted more than four per cent. They say that they can get four per cent for their money without any trouble at all—in fact, are getting four per cent for it now. And I suppose that that is true."

"No; there is no hope of a reconsideration of the matter. The deal is at an end, absolutely. This is official. Yes, you can print it. The final statement of the facts only came to me late this afternoon." And so that ends that hope for the men who work for salaries. The agitation of the matter, and the knowledge on the part of the banks that there was a prospect of getting the warrants all taken by one party at bare interest led to the reduction of the banking discount from two to one per cent. That is a great deal, but it is not all that Acting Governor Atkinson and the Territorial Treasurer hoped to accomplish. And it may be, that the hope will be realized yet at some time in the future, although Mr. Campbell was most positive in his statement yesterday that the deal was all off.

As to the legal aspect of the matter, that did not bother the officials. There is a provision in the Organic Act provided to meet just such emergencies as this, but even if there were not, it was not proposed that the Territory should borrow the money outright to take up the warrants. The plan was, if the party proposing to advance the \$500,000 had seen his way clear to do it, to turn all the warrants to the one holder, paying the salaries men their face value and letting the moneyed man make the five per cent interest that the warrants call for on their face. It was a simple plan enough. And the men who draw salaries from the Territory will hope that it may yet be worked.

In the meantime, however, the official announcement that the present negotiations have fallen through is made in order that those who have been holding their salary warrants in the hope of more favorable discount may be advised of the real status of affairs.

**BRITAIN'S ADOPTED SAILOR
PRINCE TO VISIT AMERICA**

GIBRALTAR, August 1.—A British squadron under Rear Admiral Prince Louis of Battenberg, has sailed for a three months' visit in American waters.

His Serene Highness Prince Louis Alexander of Battenberg, G.C.B., G.C., V.O., Personal Aide-de-Camp to the King and Rear Admiral in the Royal Navy, is one of the most popular of Britain's sailor princes. Although a British subject and an officer of the British navy, Prince Louis was born in Graz, Austria, and his dominions are in Hesse, Germany. He was born May 24, 1854, and was the eldest son of Prince Alexander of Hesse and grandson of the famous Louis II., Grand Duke of Hesse. He married his cousin, the Princess Victoria, daughter of Louis IV., Grand Duke of Hesse, K.G., and of Princess Alice, the daughter of Queen Victoria. The marriage occurred in 1884. The Prince is a Protestant.

In 1868 the prince was naturalized a British subject and entered the Royal Navy as a naval cadet. He was made a sub-lieutenant in 1874, a lieutenant in 1876, commander in 1885, captain in 1891 and recently he was promoted to the grade of rear-admiral. Prince Louis served in the Egyptian War in 1882 and received a medal and the Khedive's Star. He has no property in the United Kingdom, but owns Hellenberg Castle and Estate in Hesse, Germany. His heir is Prince George, born 1892. The prince is a member of numerous London clubs. The fleet which England is sending to American waters under Prince Louis comes on an errand of good-fellowship between the two nations. England has recently acknowledged the sufficiency of the American navy to care for the Western Hemisphere by withdrawing her fleets from American waters. This will be the first visit of a British fleet to America since English vessels were withdrawn from Canadian waters and the Gulf. It is safe to say that the visiting squadron will be welcomed with a spontaneous demonstration of international friendship and that the visit of Prince Louis and his gallant tars will be one long to be remembered.

REAR ADMIRAL PRINCE LOUIS OF BATTENBERG, WHO COMMANDS THE BRITISH SQUADRON ABOUT TO VISIT AMERICAN WATERS.

will be the first visit of a British fleet to America since English vessels were withdrawn from Canadian waters and the Gulf. It is safe to say that the visiting squadron will be welcomed with a spontaneous demonstration of international friendship and that the visit of Prince Louis and his gallant tars will be one long to be remembered.

AFTERNOON REPORT.

ST. PETERSBURG, August 1.—The Council of Ministers assembled today at Peterhof with the Emperor presiding. The object of the Council was to examine into the project for a national assembly.

NAGASAKI, August 1.—Secretary Taft and party sailed today for Manila in the Manchuria.

ST. PETERSBURG, August 1.—The draft of the new Franco-Russian treaty has been completed.
